CAREER OBJECTIVE

Motivated Computer Science undergraduate with hands-on experience in Python, SQL, and machine learning projects. Familiar with working on structured data, basic data processing, and supporting machine learning workflows. Seeking an entry-level Data Engineer – Machine Learning role at IBM to learn and contribute in a real-world engineering environment.

EDUCATION

- **B.Tech - Computer Science and Engineering – 7.76/10** Krishnankoil, TN | 2022–2026
Kalasalingam Academy Of Research And Education
- **Intermediate – 774/1000** Chirala, AP | 2020–2022
Vidya Mega Junior College
- **Secondary School Education – 579/600** Chirala, AP | 2019–2020
Vignana Bharathi High School

SKILLS

- **Programming Languages:** Python, SQL
- **Soft Skills:** Communication, Problem Solving, Time Management, Team Collaboration
- **Languages:** English (Fluent), Telugu (Native), Hindi (Conversational)

PROJECTS

3D-Printed Robotic Arm with Color-Sorting

Built a robotic arm capable of identifying and sorting objects based on color. Integrated software logic with hardware components to automate object placement, gaining experience with real-time input processing.

Phishing Attack Detection using NLP

Developed a machine learning model to classify emails as safe or phishing using Natural Language Processing techniques. Applied TF-IDF vectorization and Logistic Regression to analyze textual features, optimized model accuracy with hyperparameter tuning, and validated performance on real-world email datasets.

EDU-Portal – Student Learning Platform

Designed and implemented a basic web-based learning platform with a SQLite backend. Stored and managed student details, quiz scores, and learning progress. Maintained the project codebase using GitHub and handled iterative improvements.

ACHIEVEMENTS

- Participated in 2 hackathons and secured 1st place in one for an innovative tech solution.
 - Won 1st prize in IBM ICE Day competition during the first year of engineering.
-
